## PROPERTY FUNGICIDE

PROPERTY is a suspension concentrate fungicide that offers superior protection against powdery mildew in grapes, cucumbers, pumpkin, squash and melons.

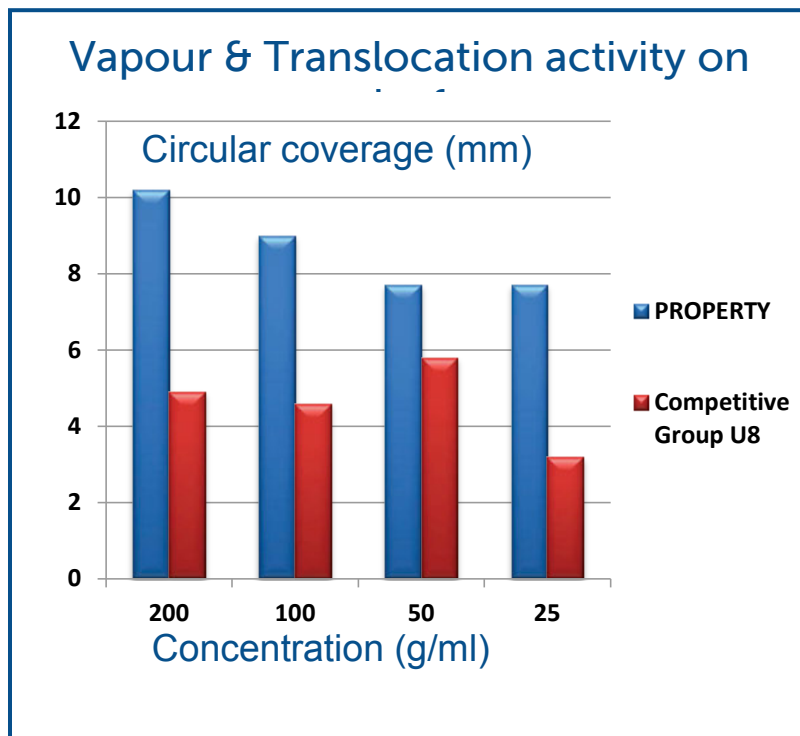

Pyriofenone, the active ingredient in PROPERTY, is the newest generation chemical found in the FRAC U8 group. It demonstrates extremely fast translaminar activity that is complemented by a "*vapour effect*" which is stronger & longer lasting than that of other chemistries found in the same group.

PROPERTY 300 SC can be used as part of a resistance management strategy that includes using it in mixtures or sequences with products that are effective against Powdery mildew and have a different mode of action, and in combination with cultural control methods.

TECHNICAL INFORMATION	
<b>For use on:</b>	Grapes, Cucurbits including cucumbers, pumpkin, squash & melons
<b>Active Ingredients:</b>	Pyriofenone
<b>Formulation:</b>	Suspension concentrate
<b>Packaging:</b>	4 x 2 L container
<b>Mode of Action:</b>	prevents the formation of haustoria and inhibits the growth of mycelium and sporulation.
<b>FRAC Group:</b>	U8
<b>Key diseases controlled:</b>	Powdery mildew,

*Property is the only group U8 fungicide that can be applied up to the day harvest on grapes.*

CROP	DISEASE CONTROLLED	RECOMMENDATIONS	INTERVAL	RESTRICTIONS	PHI	RATE
Cucurbits	Powdery Mildew	Application Instructions: Initiate applications prior to disease development Use the low rate and long interval as disease preventative sprays or when disease conditions are low. Increase to highest rate and shortest interval under moderate to heavy disease pressure.	7 – 10 days	Do not make more than 2 consecutive applications of PROPERTY 300SC Fungicide or other Group U8 containing fungicides before rotating to a fungicide with a different mode of action.	0 days	0.3 to 0.366 L / ha in 200 – 1000 L water (90 to 110 g a.i. / ha)
Grapes			14 days			Do not apply more than 1.2 L / ha / year.
